

Editor's Notes for Volume 9

Yoshimi Fukuhara*

The 9th volume of the Journal of Information and Systems in Education has been published under the editorial board. I deeply appreciate contribution of secretary members, editorial committee and reviewers who all got engaged in the editing this issue. The reviewing process of this issue has been worked out on the schedule with efforts of all persons concerned.

The number of submitted papers for this issue is 15 (8 original papers, 4 practical papers, 1 short notes and 2 report on practice, respectively). In the results under the strict and prudent reviewing, 8 papers (2 original papers, 4 practical papers, and 2 report on practice) were accepted. The selection ratio of this issue is 53% (cf. 50% of vol. 8, 50% of vol. 7, 44% of vol. 6, 58% of vol. 5, 32% of vol. 4 respectively). In addition, one invited paper was translated for this issue.

The principal keywords appeared in the accepted

paper's title are Collaborative Learning, Language Learning, Secondary Education and so on. They describe the research trend from Experiment and Trial to Practice and Development in real settings.

The Call for Papers of the next volume 10th is already on the JSiSE web-page as follows: http://www.jsise.org/e-journal/Vol10CFP_E.pdf. We believe the research papers of four categories (original, practical, short note and report on practice) will make a great contribution from various aspects in the field of ICT utilization in education: Information and Communication Technology, i.e. "Information and Systems in Education" which is written in the name of our Journal. At last, the editorial board of Volume 9 deeply thanks again for every member and non-member contributors and readers and we hope more papers from various field will be submitted for Volume 10.

* Editor-in-Chief of Editorial Committee

The Journal of Information and Systems in Education
Vol. 9 No. 1 2010

CONTENTS

- ▶ **Editor's Notes for Volume 9**Yoshimi FUKUHARA 1

【Original Papers】

- ▶ Presentation-Based Collaborative Learning Support System to Facilitate Meta-Cognitively Aware Learning Communication..... Kazuhisa SETA, Daijiro NOGUCHI and Mitsuru IKEDA 3
